

# StudyLah

A **user-friendly** way for **freshies** to organise university work

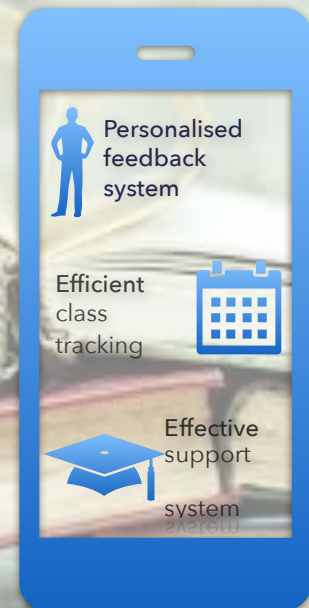

## Challenges to meet

1. Freshmen are often finding themselves with a lack of resources
2. Lecturers and TAs can only provide so much time to each individual student
3. They need a platform to receive extra support

## Proposed Solution

## Features Developed

### Backend

1. Three separate lists have been created to display all the possible sessions, the sessions the user has joined, and the sessions the user has hosted
2. Creation of a user class that stores Unique ID, email address, picture ID, to be displayed in the front-end and changed when the user wants

### Frontend

1. User authentication and ability to create new account and retrieve forgotten password
2. Ability to join and host sessions
3. Menu tab to see user's profile page (To be implemented)
4. User feedback platform and progress report
